Yair Moshkovitz - Pentester & python developer

I started to learn python myself before three years, in the army I decided to take it one step further. I pased exam in python and learned SQL, I got some experience in data and systems analysis. But I had to be released from the army before I get long experience.
At the last year I learned a lot, I did a full course in pentesting, and in addition one course on java in the university.

Ability to think outside the box, quick absorption and high motivation for self-learning.
High analytical abilities, skill in programming and problem solving.

Looking for a place to bring the talent to expression in a significant contribution.

Experience

Intelligence Corps 2022-2023
- Researcher and data analyst
- Responsible for databases (work in collaboration with 8200)

Education

Intelligence corps
- PL/SQL

Campus IL
- Python (150 hours)
